DOH in Miami-Dade County Issues a Swimming Advisory

Contact:

Communications Office
786-336-1276

A SWIMMING ADVISORY IS POSTED at the following beach sites: Sunny Isles Beach (Gilbert Samson Ocean Front Park 174th Street Collins Ave.), Haulover South Beach, and Bal Harbor Beach -96 St Collins Ave.

Miami, FL-Beach water samples collected yesterday at **Sunny Isles Beach -Gilbert Samson Ocean Front Park 174 St Collins Ave., Haulover Cut and Bal Harbor Beach -96 St Collins Ave.,** did not meet the recreational water quality standard for enterococci. By state regulation, the Florida Department of Health in Miami Dade County is required to issue an advisory to inform the public in a specific area when this standard is not met. An advisory has been issued because water samples collected at these sites **exceeded the Federal and State recommended standard for enterococci** (greater than 70 colony forming units of enterococci per 100ml for a single sample). The advisory issued recommends **not swimming** at **Sunny Isles Beach -Gilbert Samson Ocean Front Park 174 St Collins Ave., Haulover South Beach and Bal Harbor Beach -96 St Collins Ave.,** at this time. The results of the sampling indicate that water contact may pose an increased risk of illness, particularly for susceptible individuals.

The Florida Department of Health in Miami-Dade County has been conducting marine beach water quality monitoring at 16 sites, including the beach sites at most of these locations weekly since August 2002, through the Florida Healthy Beaches Program. The sampling sites are selected based on the frequency and intensity of recreational water use and the proximity to pollution sources. The water samples are being analyzed for enteric bacteria enterococci that normally inhabit the intestinal track of humans and animals, and which may cause human disease, infections, or illness. The prevalence of enteric bacteria is an indicator of fecal pollution, which may come from storm water run-off, wildlife, pets and human sewage. The purpose of the Florida Healthy Beaches program is to determine whether Florida has significant beach water quality concerns.

For more information, please visit the Florida Healthy Beaches Program Website: <http://www.flhealth.gov> and Select "Beach Water Quality", from the Environmental Health Topics List.

About the Florida Department of Health

The department, nationally accredited by the [Public Health Accreditation Board](#), works to protect, promote and improve the health of all people in Florida through integrated state, county and community efforts.
