

2013

MIAMI-DADE COUNTY
Community Health Improvement Plan

2018

miamidade.floridahealth.gov

Executive Summary

The Florida Department of Health in Miami-Dade County is pleased to present the Community Health Improvement Plan (CHIP) to our community. This plan was developed with input from a multidisciplinary and multisectorial group of community leaders coming together to develop a comprehensive health agenda. The CHIP is a plan that the entire public health system in Miami-Dade County will be able to follow in order to coordinate resources for more efficient targeted and integrated health improvement efforts (Florida Department of Health, 2012). The CHIP is directly linked to the State Health Improvement Plan (SHIP).

According to the 2012 U.S. Census Bureau , Miami-Dade County (MDC) had a population of 2,527,709, making it the most populous county in Florida and the eighth most populous county in the nation (U.S. Census Bureau, 2012) With a land area of 1,946 square miles, Miami-Dade is the second largest county in Florida. MDC is one of the few counties in the U.S. that is “minority majority”; meaning the minority comprises the majority of the population. More than two-thirds of the residents are Hispanic and 19% are Black. Over 51.2% of its more than 2.5 million residents are foreign-born, a percentage greater than any other county in the U.S. which makes Miami a large multicultural, multi-linguistic population (U.S. Census Bureau, 2012). Furthermore, 72% of residents age five and older speak another language other than English at home, mostly Spanish and Creole (U.S. Census Bureau, 2012). Unlike much of Florida, MDC has a relatively young population with 21% of individuals under 18 years of age (U.S. Census Bureau, 2012). Only 26.3% of residents age 25 and over have a bachelor’s degree or higher. In 2012, the median household income was \$43,464 and the per capita income was \$23,304 (U.S. Census Bureau, 2012), with over 19.4% of individuals living below poverty level, M-D County residents are at-risk of poor health status. Further exacerbating health disparities in the county are the high rate of uninsured individuals. An estimated 29.8% of the population (over 700,000 individuals) ages 0-64 years are uninsured in MDC (U.S. Census Bureau, 2012).

The 2013 Miami-Dade Community Health Needs Assessment Household Survey Report provides valuable information about the existing burden of chronic diseases, health behaviors, risk factors and disparities observed in the county. The survey indicates that an overwhelming 82.2% of respondents exhibit one or more of the following cardiovascular risk factors: overweight/obese (62.4%), no leisure-time physical activity in the past month (29.9%), high blood pressure (32.6%), high blood cholesterol (32.2%), and cigarette smoking (10.1%) (Professional Research Consultants Inc., 2013). The data is aligned with the results from the 2010 Behavioral Risk Factor Surveillance System (BRFSS) which indicated that 66.5% of MDC adults were either obese or overweight (Centers for Disease Control and Prevention, 2012).

Prevention Quality Indicators (PQIs) data further reveals disparities in health observed across the county. PQIs help identify avoidable hospital admissions indicate gaps in service, lack of access, lack of insurance, and poverty. Analysis of the 2012 Agency for Healthcare Research and Quality, Department of Health and Human Services, shows higher burdens for a number of these PQIs (e.g. diabetes, hypertension, congestive heart failure) in zip codes such as 33150, 33136, 33054, 33147, 33128, 33010 and 33127 which fall under communities such as Opa-Locka, Hialeah, Little Haiti, Overtown, Liberty City, North Miami and City of Miami. Many of

these communities have high minority populations as well as a high number of low income individuals and families (Professional Research Consultants Inc., 2013).

The CHIP was developed as a result of a comprehensive assessment process which was conducted within a span of 8 months. The Florida Department of Health in Miami-Dade County partnered with the Health Council of South Florida to conduct the Mobilizing for Action through Planning and Partnerships (MAPP), a process that focuses on community health priorities, goals and strategies in Miami-Dade County. The following four assessments were conducted:

- i. Local Public Health System Performance Assessment (LHPSA)
- ii. Community Themes and Strengths Assessment (CTSA)
- iii. Forces of Change Assessment (FOCA)
- iv. Community Health Status Assessment (CHNA)

Upon the completion of the comprehensive community assessment, twenty health priorities were identified. Upon further evaluation five focus areas were established as the foundation for the Community Health Improvement Plan: access to care, chronic disease prevention, healthcare disparities, mental health and mental disorders, HIV, STD and infectious diseases.

The Florida Department of Health in Miami-Dade County organized the Community Health Improvement Plan by incorporating the twenty health priorities identified in the MAPP process into the five strategic areas as set forth in the State Health Improvement Plan: Health Promotion, Chronic Disease Prevention, Community Redevelopment, Access to Care, and Health Infrastructure.

The Role of Public Health

In a study conducted in 1988 by the Institute of Medicine and published in a report titled the Future of Public Health, public health is defined as the “fulfillment of society’s interest in assuring the conditions in which people can be healthy” (Schneider, 2000). Public health activities are achieved through the formal structure of government and through the collaboration and partnerships with private and voluntary organizations. The core functions of public health stem around three activities assessments, policy development, and assurance (Schneider, 2000). The public health system is made up of all public, private and voluntary organizations that contribute to the well-being of a community. This system includes public agencies at all levels, healthcare providers; public safety agencies; human services and charity organizations; education and youth development organizations; recreation and arts related organizations; economic and philanthropic organizations; and environmental agencies and organizations (please refer to figure 1) (Centers for Disease Control and Prevention, 2013).

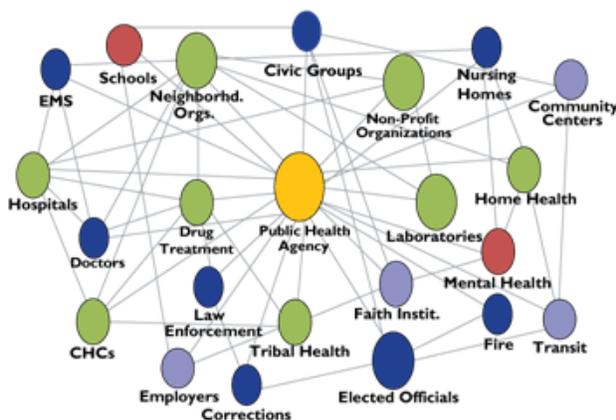

Figure 1

As previously stated there are three core functions of public health, however within these three core functions there are ten essential services. These ten essential services are the activities that are undertaken in all communities within the nation’s local health departments. They are:

1. Monitor health status to identify and solve community health problems.
2. Diagnose and investigate health problems and health hazards in the community.
3. Inform, educate, and empower people about health issues.
4. Mobilize community partnerships and action to identify and solve health problems.
5. Develop policies and plans that support individual and community health efforts.

6. Enforce laws and regulations that protect health and ensure safety.
7. Link people to needed personal health services and assure the provision of healthcare when otherwise unavailable.
8. Assure a competent public and personal health care workforce.
9. Evaluate effectiveness, accessibility, and quality of personal and population-based health services.
10. Research for new insights and innovative solutions to health problems (Centers for Disease Control and Prevention, 2013). Please refer to figure 2.

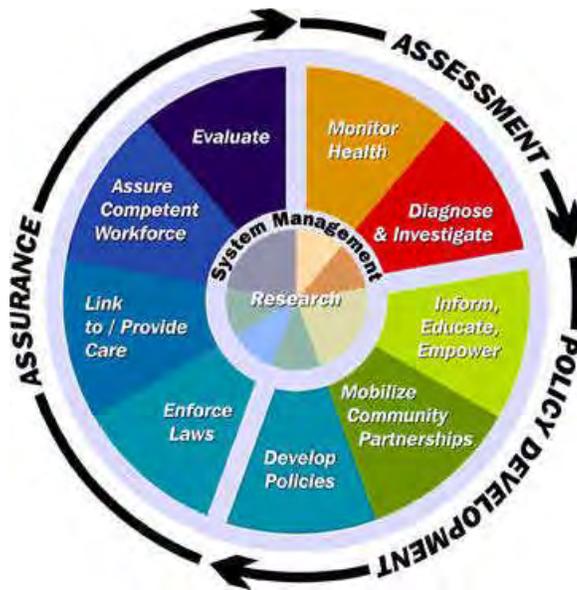

Figure 2

In 2013, the community participated in the Mobilizing for Action through Planning and Partnerships (MAPP) process that focuses on community health priorities, goals and strategies in Miami Dade County. MAPP is a community wide strategic planning framework for improving public health. It helps communities prioritize their public health issues, identify resources for addressing them, and implement strategies relevant to their community settings (Health Council of South Florida, 2013). After reviewing current community health improvement efforts, the Florida Department of Health in Miami Dade County in collaboration with the Health Council of South Florida conducted the following four assessments:

1. **Local Public Health System Performance Assessment (LHPSA):** involves bringing the public health community together to reflect on the performance of the system and identify areas of success and improvement. The National Public Health Performance

Standards Program (NPHPSP) is used to conduct the measure of partner collaboration in the public health system. (Health Council of South Florida, 2013).

2. **Community Themes and Strengths Assessment (CTSA):** provides an understanding of the issues residents feel are important by addressing the questions: “What is important to our community?” “How is quality of life perceived in our community?” and “What assets do we have that can be used to improve community health?” During this phase, information gathered directed the strategic issues identification phase of the MAPP process (Health Council of South Florida, 2013).
3. **Forces of Change Assessment (FOCA):** identifies legislation, technology, and other changes that affect the context in which the community and its public health system operate (Health Council of South Florida, 2013).
4. **Community Health Status Assessment (CHNA):** provides a list of core indicators for 11 broad-based categories and communities which may also be involved in the selection of additional indicators. Health issues are identified by collecting data for each of these and comparing the jurisdiction’s data to trend information or peer, state, and national data (Health Council of South Florida, 2013). Please refer to Figure 3.

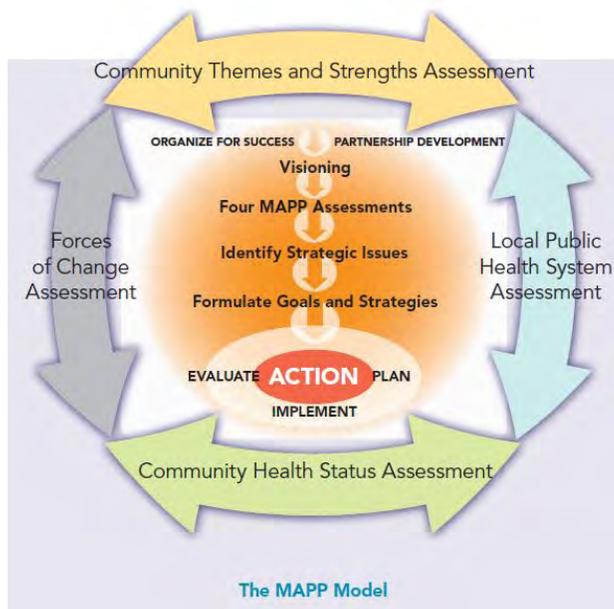

Figure 3

Upon the completion of the comprehensive community assessment, twenty health priorities were identified. Upon further evaluation, five focus areas were established as the foundation for the Community Health Improvement Plan:

- I. Access to Care**
- II. Chronic Disease Prevention**
- III. Healthcare Disparities**
- IV. Mental Health & Mental Disorders**
- V. HIV, STD and Infectious Diseases**

The Florida Department of Health in Miami-Dade County organized the Community Health Improvement Plan by incorporating the twenty health priorities identified in the MAPP process into the five strategic areas as set forth in the State Health Improvement Plan: Health Promotion, Chronic Disease Prevention, Community Redevelopment, Access to Care, and Health Infrastructure.

Community Health Improvement Plan

Topic Areas

The five topic areas are inclusive of the Top 20 MAPP Community Health Priorities (MAPP Priority ranking in parenthesis)

- I. Access to Care (1)**
 - Primary Care & Medical Homes (4)
 - Increased Interagency coordination (8)
 - Special Needs populations (12)
 - Undocumented population (15)
 - Cultural competencies (16)
 - Workforce (17)
 - Oral Health (18)

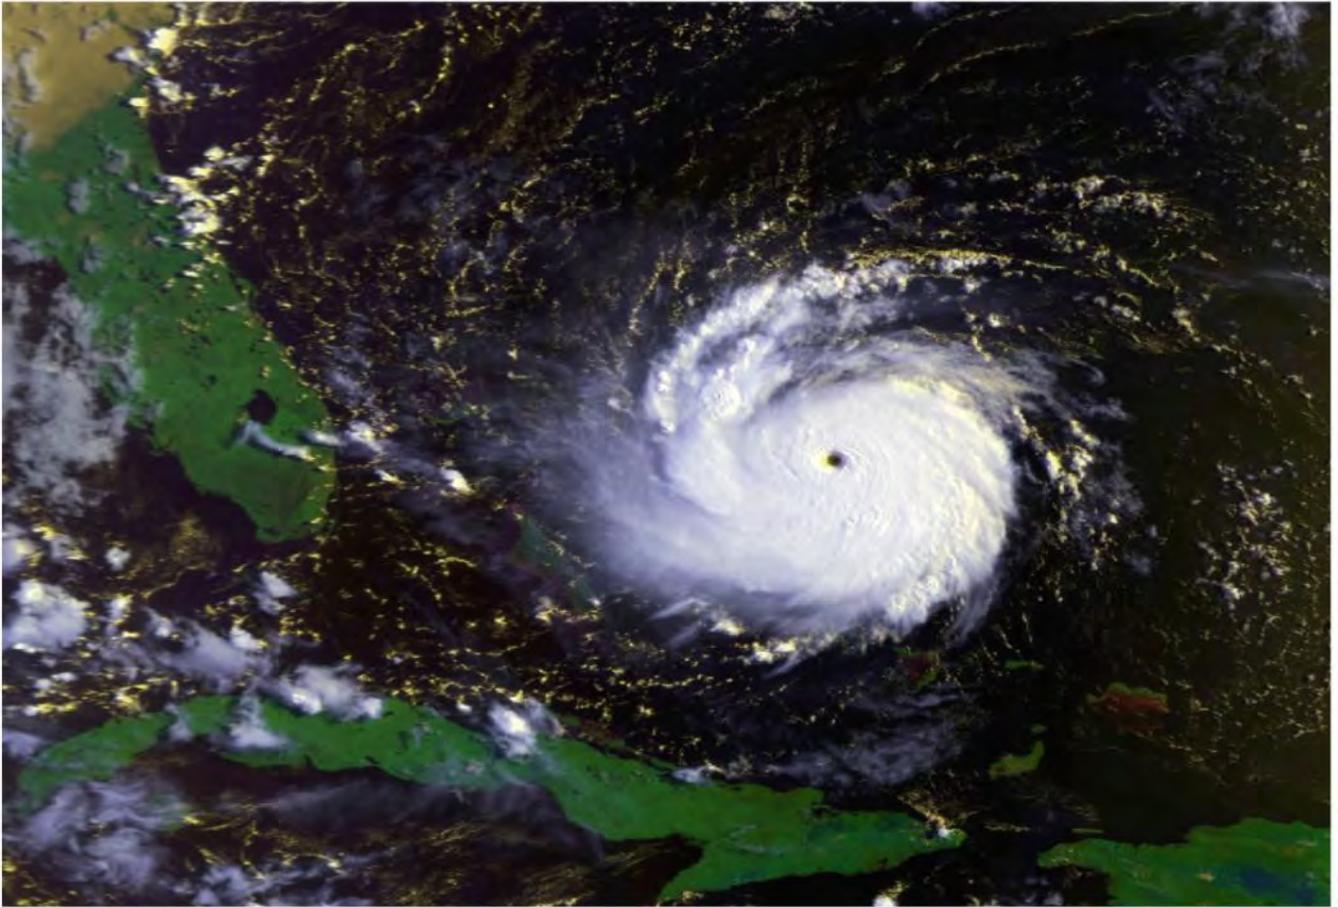

- II. Chronic Disease Prevention (2)**
 - Heart Disease & Stroke (9)
 - Cancer (11)
 - Tobacco use (20)
 - Nutrition & Physical activity (5)
 - Increased Interagency Coordination (8)

- III. Healthcare Disparities (3)**
 - Socioeconomic factors (7)
 - Injury & Violence Prevention (19)
 - Maternal and Child Health (14)
 - Increased Interagency Coordination (8)

- IV. Mental Health & Mental Disorders (6)**
 - Substance Abuse & Excessive Drinking (13)
 - Increased Interagency Coordination (8)

- V. HIV, STD and Infectious Diseases (10)**
 - Increased Interagency Coordination (8)

Health Protection

- **Prevent and control infectious diseases**
- **Prevent and Reduce illness, injury and death related to environmental factors**
- **Minimize loss of life, illness and injury from natural or man-made disasters**
- **Prevent and reduce unintentional and intentional injuries**

Strategic Issue Area:

Prevent and Control Infectious Diseases

HP2020 Goal: IID-7 Achieve and maintain effective vaccination coverage levels for universally recommended vaccines among young children.

SHIP Strategy: HP1.1 Prevent disease, disability and death through immunization by advancing programs including Florida State Health Online Tracking System (Florida SHOTS), Vaccines for Children Program, Vaccine Preventable Disease Surveillance activities, assessment of immunization coverage levels among target populations, and operational reviews or program compliance visits among health care providers.

SHIP Objective: HP1.1.1 By Dec. 31, 2015, increase the percentage of two-year-olds who are fully immunized from 86.6% (2005) to 90%.

Local Strategy: Develop a process to assure that all vaccinations received by children in the county are properly monitored using the Florida State Health On-line tracking system (Florida SHOTS).

Local Objective: By Dec. 31, 2019, increase the percentage of two-year olds who are fully immunized from 86.5% to 90% in Miami-Dade.

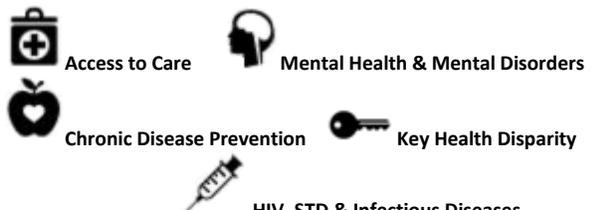

Baseline:

Miami-Dade: 86.5%

Florida: 86.1% (CHARTS)

Priority Area Key

-  Access to Care
-  Mental Health & Mental Disorders
-  Chronic Disease Prevention
-  Key Health Disparity
-  HIV, STD & Infectious Diseases

Collaborative Agencies:

Florida Department of Health in Miami-Dade
Miami-Dade County Immunization Coalition
Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Prevent and Control Infectious Diseases

HP2020 Goal: IID-1 Reduce, eliminate, or maintain elimination of cases of vaccine-preventable diseases.

SHIP Strategy: HP1.1 Prevent disease, disability and death through immunization by advancing programs including Florida State Health Online Tracking System (Florida SHOTS), Vaccines for Children Program, Vaccine Preventable Disease Surveillance activities, assessment of immunization coverage levels among target populations, and operational reviews or program compliance visits among health care providers.

SHIP Objective: HP1.1.2 By Dec. 31, 2015, increase the percentage of adults aged 65 and older who have had a flu shot in the last year from 65.3% to 75%.

Local Strategy: Develop a community awareness campaign that encourages adults to obtain their influenza vaccine.

Local Objective: By Dec. 31, 2019, increase the percentage of adults aged 65 and older who have had a flu shot in the last year from 50.8% to 75% in Miami-Dade.

Baseline:

Miami-Dade: 50.8%
Florida: 65.3% (BRFSS, 2010)

Priority Area Key

	Access to Care		Mental Health & Mental Disorders
	Chronic Disease Prevention		Key Health Disparity
		HIV, STD & Infectious Diseases	

Collaborative Agencies:

Florida Department of Health in Miami-Dade
Miami-Dade County Immunization Coalition
Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Prevent and Control Infectious Diseases

HP2020 Goal: IID-7 Achieve and maintain effective vaccination coverage levels for universally recommended vaccines among young children.

SHIP Strategy: HP1.1 Prevent disease, disability and death through immunization by advancing programs including Florida State Health Online Tracking System (Florida SHOTS), Vaccines for Children Program, Vaccine Preventable Disease Surveillance activities, assessment of immunization coverage levels among target populations, and operational reviews or program compliance visits among health care providers.

SHIP Objective: HP1.1.3 By Dec. 31, 2015, increase the percentage of two year old CHD clients fully immunized from 94% (2011) to 95%.

Local Strategy: Assure that all vaccinations of children attending daycares and schools in Miami-Dade meet the immunization requirements.

Local Objective: By Dec. 31, 2019, increase the percentage of two year old clients that are fully immunized by DOH-Miami-Dade from 95% to 96%.

Baseline:

Miami-Dade: 95% (DOH-Miami-Dade Results Scorecard, 2013)

Priority Area Key

 Access to Care	 Mental Health & Mental Disorders
 Chronic Disease Prevention	 Key Health Disparity
 HIV, STD & Infectious Diseases	

Collaborative Agencies:

Florida Department of Health in Miami-Dade
Miami-Dade County Immunization Coalition
Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Prevent and Control Infectious Diseases

HP2020 Goal: IID-1.4 Reduce measles cases (U.S.-acquired cases)

SHIP Strategy: HP1.1 Prevent disease, disability and death through immunization by advancing programs including Florida State Health Online Tracking System (Florida SHOTS), Vaccines for Children Program, Vaccine Preventable Disease Surveillance activities, assessment of immunization coverage levels among target populations, and operational reviews or program compliance visits among health care providers.

SHIP Objective: HP1.1.4 By Dec. 31, 2015, the number of confirmed cases of measles in children under 19 will be zero.

Local Strategy: Develop a process to educate the community on measles prevention.

Local Objective: By Dec. 31, 2019, the number of confirmed cases of measles in children under 19 in Miami-Dade will be zero.

Baseline:

Miami-Dade: 0
Florida: 9 (CHARTS, 2011)

Priority Area Key

-  Access to Care
-  Mental Health & Mental Disorders
-  Chronic Disease Prevention
-  Key Health Disparity
-  HIV, STD & Infectious Diseases

Collaborative Agencies:

Florida Department of Health in Miami-Dade
Miami-Dade County Immunization Coalition

Strategic Issue Area:

Prevent and Control Infectious Diseases

HP2020 Goal: IID-1 Reduce, eliminate, or maintain elimination of cases of vaccine-preventable diseases.

SHIP Strategy: HP1.1 Prevent disease, disability and death through immunization by advancing programs including Florida State Health Online Tracking System (Florida SHOTS), Vaccines for Children Program, Vaccine Preventable Disease Surveillance activities, assessment of immunization coverage levels among target populations, and operational reviews or program compliance visits among health care providers.

SHIP Objective: HP1.1.5 By Dec. 31, 2015, the number of confirmed cases of Haemophilus influenzae type B in children under 19 will be zero.

Local Strategy: Develop an educational awareness campaign for the community explaining the importance of having children properly immunized against vaccine preventable diseases.

Local Objective: By Dec. 31, 2019, the number of confirmed cases of Haemophilus influenzae type B in children under 19 in Miami-Dade will be zero.

Baseline:

Miami-Dade: 4
Florida: 35 (CHARTS, 2012)

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade
Miami-Dade County Immunization Coalition

Strategic Issue Area:

Prevent and Control Infectious Diseases

HP2020 Goal: Promote healthy sexual behaviors, strengthen community capacity, and increase access to quality services to prevent sexually transmitted diseases (STDs) and their complications.

SHIP Strategy: HP1.2 Prevent exposure to, and infection from illness and disease-related complications from sexually transmitted diseases (STDs), tuberculosis (TB) and other infectious diseases through educational outreach, testing, behavior change, early identification and treatment and community collaboration.

SHIP Objective: HP1.2.1 By Dec. 31, 2013, reduce the bacterial STD case rate among females 15–34 years of age from 2627.3 per 100,000 (2010) to 2620 per 100,000.

Local Strategy: Develop Memorandums of Agreement to expand bacterial STD testing and educational programs for students, teachers and staff and testing programs in schools and school events.

Local Objective: By Dec. 31, 2019, reduce the bacterial STD case rate among females 15–34 years of age from 2098.8 per 100,000 to 2091.5 per 100,000 in Miami-Dade.

Baseline:

Miami-Dade: 2098.8

Florida: 2606.1 (CHARTS,2012)

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Prevent and Control Infectious Diseases

HP2020 Goal: Promote healthy sexual behaviors, strengthen community capacity, and increase access to quality services to prevent sexually transmitted diseases (STDs) and their complications.

SHIP Strategy: HP1.2 Prevent exposure to, and infection from illness and disease-related complications from sexually transmitted diseases (STDs), tuberculosis (TB) and other infectious diseases through educational outreach, testing, behavior change, early identification and treatment and community collaboration.

SHIP Objective: HP1.2.2 By Dec. 31, 2015, increase the percentage of women diagnosed with a bacterial STD and treated within 14 days from 75% to 90%.

Local Strategy: Assure that an appointment system be in effect at the STD Clinics and clients needing treatment can be seen promptly with shorter wait times.

Local Objective: By Dec. 31, 2019, increase the percentage of women diagnosed with Chlamydia cases treated within 14 days in Miami-Dade from 94% to 99%. By Dec. 31, 2019, increase the percentage of women diagnosed with Primary & Secondary syphilis cases treated within 14 days in Miami-Dade from 85% to 90%.

Priority Area Key

- Access to Care
- Mental Health & Mental Disorders
- Chronic Disease Prevention
- Key Health Disparity
- HIV, STD & Infectious Diseases

Collaborative Agencies:

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Prevent and Control Infectious Diseases

HP2020 Goal: GH-2 Reduce the tuberculosis (TB) case rate for foreign-born persons living in the United States.

SHIP Strategy: HP1.2 Prevent exposure to, and infection from illness and disease-related complications from sexually transmitted diseases (STDs), tuberculosis (TB) and other infectious diseases through educational outreach, testing, behavior change, early identification and treatment and community collaboration.

SHIP Objective: HP1.2.3 By Dec. 31, 2015, reduce the TB case rate from 4.4 per 100,000 (2009) to 3.5 per 100,000.

Local Strategy: Provide educational outreach, testing, behavior change, early identification, treatment and community collaboration in Miami Dade to reduce the TB case rate.

Local Objective: By Dec. 31, 2015, reduce the TB case rate from 6.19 per 100,000 to 3.5 per 100,000 in Miami Dade.

Baseline:

Miami-Dade: 6.19
Florida: 4.0 (CHARTS, 2011)

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Prevent and Control Infectious Diseases

HP2020 Goal: GH-2 Reduce the tuberculosis (TB) case rate for foreign-born persons living in the United States.

SHIP Strategy: HP1.2 Prevent exposure to, and infection from illness and disease-related complications from sexually transmitted diseases (STDs), tuberculosis (TB) and other infectious diseases through educational outreach, testing, behavior change, early identification and treatment and community collaboration.

SHIP Objective: HP1.2.4 By Dec. 31, 2015, the completion of treatment rate for active TB cases will be 98%.

Local Strategy: Create a plan in order to increase the treatment rate for active TB cases in Miami-Dade through educational outreach, testing, behavior change, early identification, treatment and community collaboration.

Local Objective: By Dec. 31, 2019, the completion of treatment rate for active TB cases in Miami-Dade will increase from 58.28 to 98%.

Baseline:

Miami-Dade: 58.28
Florida: 70.4 (CHARTS, 2010)

Priority Area Key

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Prevent and Control Infectious Diseases

HP2020 Goal: HIV-10 (Developmental) Increase the proportion of HIV-infected adolescents and adults who receive HIV care and treatment consistent with current standards.

SHIP Strategy: HP1.3 Prevent exposure, infection, illness and death related to HIV and AIDS through educational outreach, enhanced testing initiatives, human behavior change, and county and community collaborations with particular focus on reducing social stigma and racial disparities.

SHIP Objective: HP1.3.5 By Dec. 31, 2015, increase the percentage of currently enrolled AIDS Drug Assistant Program (ADAP) clients with suppressed viral load from 85% (2010) to 90%.

Local Strategy: Improve efforts to increase adherence to treatment and program compliance.

Local Objective: By Dec. 31, 2019, increase the percentage of currently enrolled AIDS Drug Assistant Program (ADAP) clients in Miami-Dade with suppressed viral load from 92.8% to 93%.

Baseline: Pending.

Priority Area Key

Access to Care Mental Health & Mental Disorders
Chronic Disease Prevention Key Health Disparity
HIV, STD & Infectious Diseases

Collaborative Agencies:

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Prevent and Control Infectious Diseases

HP2020 Goal: Promote healthy sexual behaviors, strengthen community capacity, and increase access to quality services to prevent sexually transmitted diseases (STDs) and their complications.

SHIP Strategy: HP1.4 Conduct disease surveillance to detect, monitor and collect data for public health program planning, evaluation and policy development.

SHIP Objective: HP1.4.1 By Dec. 31, 2012, greater than 75% of selected reportable disease cases of public health significance will be reported from CHDs within 14 days of notification.

Local Strategy: Monitor case investigation status and enhance communication with health care providers.

Local Objective: By Dec. 31, 2016, the percentage of High Titer Syphilis Field Records dispositioned within 14 days of notification in Miami-Dade will increase from 92% to 95%.

By Dec. 31, 2016, the percentage of Primary & Secondary Syphilis cases treated within 14 days of notification in Miami-Dade notification will increase from 85% to 88%.

By Dec. 31, 2016, Miami-Dade female Chlamydia cases treated within 14 days notification will increase from 85% to 88%.

- SHIP Strategy:** CD1.2 Promote the use of evidenced-based clinical guidelines to assess overweight and obesity and establish principles of safe and effective weight loss
- SHIP Objective:** CD1.2.2 By Dec. 31, 2014, increase by 10% the number of targeted health care providers who provide counseling or education related to achieving or maintaining a healthy weight for their patients.
- Local Strategy:** An educational campaign targetted for providers in order to disseminate information to their patients who are overweight or obese.
- Local Objective:** By Dec. 31, 2014, increase by 10% the number of targeted health care providers who provide counseling or education related to achieving or maintaining a healthy weight for their patients.
- Baseline:** No baseline data available.

Priority Area Key

Collaborative Agencies:

Miami-Dade Health Action Network
Florida Department of Health in Miami-Dade County
Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Increase the percentage of adults and children who are at a healthy weight

HP2020 Goal: NWS-11(Developmental) Prevent inappropriate weight gain in youth and adults

SHIP Strategy: CD1.3 Increase the availability of healthful food

SHIP Objective: CD1.3.1 By June 30, 2013, DOH will identify and disseminate model policies and practices that increase availability and consumption of healthy foods.

Local Strategy: Disseminate model policies and practices about healthy eating and increasing access to healthy food and beverages.

Local Objective: By June 30, 2015, identify model policies practices that increase availability and consumption of healthy foods.

Baseline: No baseline data available.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade,
Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Increase the percentage of adults and children who are at a healthy weight

HP2020 Goal: NWS-11(Developmental) Prevent inappropriate weight gain in youth and adults

SHIP Strategy: CD1.3 Increase the availability of healthful food

SHIP Objective: CD1.3.2 By June 30, 2013, DOH and the Department of Management Services will work to disseminate best practices and model policies to offer competitively priced healthy foods in vending machines in all state/public buildings.

Local Strategy: Disseminate model policies and practices about healthy eating and increasing access to healthy foods available in local and public buildings.

Local Objective: By June 30, 2014, the Department of Management Services will work to disseminate best practices and model policies to offer competitively priced healthy foods in vending machines in all local and public buildings.

Baseline: No baseline data available.

Priority Area Key

Collaborative Agencies:

Consortium for a Healthier Miami-Dade
Florida Department of Health in Miami-Dade

Strategic Issue Area:

Increase the percentage of adults and children who are at a healthy weight

HP2020 Goal: NWS-13 Reduce household food insecurity and in doing so reduce hunger

SHIP Strategy: CD1.3 Increase the availability of healthful food

SHIP Objective: CD1.3.3 By June 30, 2013, DOH will facilitate agreement among stakeholders on a standard data source or methodology for identifying food deserts.

Local Strategy: Develop a process to determine and disseminate best practices which can be used to identify food deserts within our county.

Local Objective: By June 30, 2015, FDOH MD will facilitate agreement among stakeholders on a standard data source or methodology for identifying food deserts within our county.

Baseline: Supermarket Access Report.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade
Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Increase the percentage of adults and children who are at a healthy weight

HP2020 Goal: NWS-14 Increase the contribution of fruits to the diets of the population aged 2 years and older

SHIP Strategy: CD1.3 Increase the availability of healthful food

SHIP Objective: CD1.3.5 By June 30, 2013, DOH will collaborate with the U.S. Dept. of Agriculture's Women, Infants and Children (WIC) and Supplemental Nutrition Assistance Program (SNAP) to expand opportunities to purchase healthy foods for users of these services.

Local Strategy: Expand healthy food purchase options.

Local Objective: By June 30, 2015, FDOH MD will collaborate with the U.S. Dept. of Agriculture's Women, Infants and Children (WIC) and Supplemental Nutrition Assistance Program (SNAP)

1. To expand opportunities to purchase healthy foods for users of these services.
2. To Decrease the percentage of WIC children 2 years and older who are overweight or at risk of being overweight by 10%.

Baseline:

Miami-Dade: 31.7%

Florida: 28.8%

Key Health Disparity

HIV, STD & Infectious Diseases

Collaborative Agencies:

Florida Department of Health in Miami-Dade,
 Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Reduce illness, disability and death related to tobacco use and secondhand smoke exposure

HP2020 Goal: Reduce illness, disability, and death related to tobacco use and secondhand smoke exposure.

SHIP Strategy: CD4.3 Eliminate Floridians' exposure to secondhand tobacco smoke

SHIP Objective: CD4.3.2 By Dec. 31, 2015, reduce the percentage of Florida youth, ages 11–17 who were exposed to secondhand smoke in a room or car during the past 7 days from 50.3% (2010) to 45.3%.

Local Strategy: Develop an educational campaign on the dangers of youth being exposed to secondhand smoke in a room or car.

Local Objective: By Dec. 31, 2015, reduce the percentage of Miami-Dade teens (11-17) who have been exposed to second-hand smoke in the last 30 days from 39.7% to 29.8%.

Baseline:

Miami-Dade 39.7%
Florida: 44.1% (FYTS, 2013)

Community Redevelopment and Partnerships

- **Integrate planning and assessment processes to maximize partnerships and expertise of a community in accomplishing its goals.**
- **Build and revitalize communities so people can live healthy lives.**
- **Provide equal access to culturally and linguistically competent care.**

Strategic Issue Area:

Integrate planning and assessment processes to maximize partnerships and expertise of a community in accomplishing its goals.

HP2020 Goal: Promote health for all through a healthy environment.

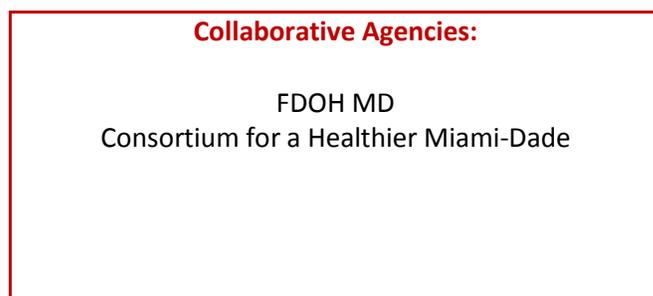

SHIP Strategy: CR1.1 Include a public health component in community planning processes to increase awareness and opportunity for the built environment to impact healthy behaviors.

SHIP Objective: CR1.1.1 By Dec. 31, 2013, DOH and the Florida Association of Health Planning Agencies will develop and share model health-related language for comprehensive plans.

Local Strategy: Provide technical assistance to local urban planners, Miami-Dade Transit, Building and Zoning, in addition to other entities that deals with the built environment.

Local Objective: By December 31, 2015 reach out to all of the municipalities within Miami-Dade encouraging them to include health related language in their Comprehensive Development Master Plan.

Baseline: No baseline data available.

Strategic Issue Area:

Integrate planning and assessment processes to maximize partnerships and expertise of a community in accomplishing its goals.

HP2020 Goal: Promote health for all through a healthy environment.

SHIP Strategy: CR1.1 Include a public health component in community planning processes to increase awareness and opportunity for the built environment to impact healthy behaviors.

SHIP Objective: CR1.1.2 By Dec. 31, 2014, all county health departments will have public health attendance in their community planning processes with each of the 67 county planning boards.

Local Strategy: Increase collaboration with partners in order to assure that the built environment incorporates opportunity for healthy behaviors to be incorporated into planning documents.

Local Objective: By December 30, 2014 a plan will be devised with action steps by the Consortium's Health and the Built Environment that will increase awareness and opportunity for the built environment to impact behavior.

Baseline: No baseline data is available.

HP2020 Goal: Promote health for all through a healthy environment.

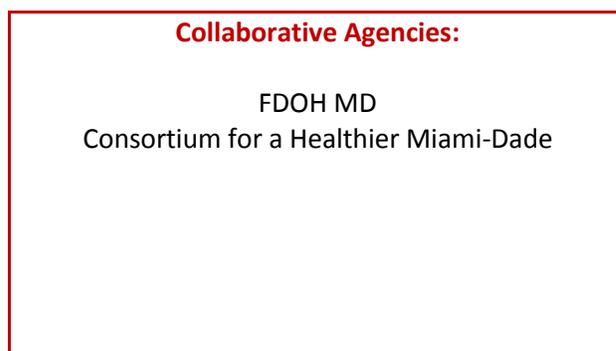

SHIP Strategy: CR1.1 Include a public health component in community planning processes to increase awareness and opportunity for the built environment to impact healthy behaviors.

SHIP Objective: CR1.1.3 By Dec. 31, 2015, at least 20% of county comprehensive plans will include health components.

Local Strategy: Recommendations will be formulated to improve public planning documents and policies on an ad hoc basis.

Local Objective: By December 31, 2018 a minimum of three municipalities will adapt health related language in their Comprehensive Development Master Plan based on the plan written by Miami-Dade County.

Baseline: No baseline data available.

Strategic Issue Area:

Integrate planning and assessment processes to maximize partnerships and expertise of a community in accomplishing its goals.

HP2020 Goal: Promote health for all through a healthy environment.

SHIP Strategy: CR1.2 Share effective strategies and messages that support the connection between the built environment and healthy behaviors.

SHIP Objective: CR1.2.1 By Sept. 30, 2013, DOH will work with the Centers for Disease Control and Prevention and others to document evidence-based practices that support the connections between health & the built environment health.

Local Strategy: Identify and disseminate evidence-based practices that support the connections between health and the built environment.

Local Objective: By December 31, 2015 The Health and Built Environment Committee of the Consortium will determine the criteria for dissemination of evidenced based practices that support the connections between health and the built environment.

Baseline: No baseline data available.

- HP2020 Goal:** MHMD-9 Increase the proportion of adults with mental health disorders who receive treatment
- SHIP Strategy:** AC3.2 Reduce barriers to substance abuse and mental health services that impact the ability of children and adults to live and participate in their communities.
- SHIP Objective:** AC3.2.1 By Dec. 31, 2015, the percentage of children and adults adequately prepared to achieve and maintain independence will be sustained (for example, 24% of adults with serious mental illness are competitively employed; and seriously emotionally disturbed children attended 86% of school days).
- Local Strategy:** Encourage partners to provide increased education on substance abuse and mental health services within our community.
- Local Objective:** By December 2017 the percentage of children and adults adequately prepared to achieve and maintain independence will be sustained.
- Baseline:** Pending.

Priority Area Key

Access to Care

Mental Health & Mental Disorders

Chronic Disease Prevention

Key Health Disparity

HIV, STD & Infectious Diseases

Collaborative Agencies:

Consortium for a Healthier Miami-Dade,
Florida Department of Health in Miami-Dade,
Miami-Dade Health Action Network

Strategic Issue Area:

Enhance access to preventive, restorative and emergency oral health care.

- HP2020 Goal:** OH-4 Prevent and control oral and craniofacial diseases, conditions, and injuries, and improve access to preventive services and dental care.
- SHIP Strategy:** AC4.1 Revise and collaboratively implement Florida’s State Oral Health Improvement Plan (SOHIP).
- SHIP Objective:** AC4.1.1 By Sept. 30, 2012, a revised Florida State Oral Health Improvement Plan (SOHIP) will be published and disseminated.
- Local Strategy:** Partner with local organizations to implement an efficient method that enhances opportunities for oral health.
- Local Objective:** By January 31, 2015 the DOH-Miami-Dade will release its Community Health Improvement Plan which will include objectives for oral health.
- Baseline:** Pending.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade,
Conorsitium for a Healthier Miami-Dade

Strategic Issue Area:

Enhance access to preventive, restorative and emergency oral health care.

- HP2020 Goal:** OH-4 Prevent and control oral and craniofacial diseases, conditions, and injuries, and improve access to preventive services and dental care.
- SHIP Strategy:** AC4.1 Revise and collaboratively implement Florida’s State Oral Health Improvement Plan (SOHIP).
- SHIP Objective:** AC4.1.5 By June 30, 2014, analyze and report on costs and payment mechanisms for dental care in Florida.
- Local Strategy:** Develop a process to successfully implement appropriate sections of the oral health improvement plan in Miami-Dade.
- Local Objective:** By June 30, 2015, analyze and report on costs and payment mechanisms for dental care in Miami-Dade.
- Baseline:** Pending.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade,
Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Enhance access to preventive, restorative and emergency oral health care.

- HP2020 Goal:** OH-4 Increase the proportion of children, adolescents, and adults who used the oral health care system in the past year
- SHIP Strategy:** AC4.2 Promote integration between the oral health care system and other health care providers, including information sharing, education for medical providers on preventive dental health services, more effective reimbursement, and incentives for improving coordination of care to improve access to oral health services and revision of Medicaid reimbursement rules.
- SHIP Objective:** AC4.2.1 By Dec. 31, 2014, increase the percentage of adults who report having visited a dentist or dental clinic in the past year from 64.7% to 67%.
- Local Strategy:** Develop a process to integrate oral health awareness activities into the community.
- Local Objective:** By Dec. 31, 2018, increase the percentage of adults who visited a dentist or dental clinic in the past year in Miami-Dade from 65.2% to 67%.

Baseline:

Miami Dade: 65.2
Florida: 64.7% (BRFSS, 2010)

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade
Women's Health & Preventive Services, Area Health
Education Center

Strategic Issue Area:

Enhance access to preventive, restorative and emergency oral health care.

HP2020 Goal: OH-7 Reduce the proportion of adults who have ever had a permanent tooth extracted because of dental caries or periodontal disease

SHIP Strategy: AC4.2 Promote integration between the oral health care system and other health care providers, including information sharing, education for medical providers on preventive dental health services, more effective reimbursement, and incentives for improving coordination of care to improve access to oral health services and revision of Medicaid reimbursement rules.

SHIP Objective: AC4.2.2 By Dec. 31, 2014, reduce the percentage of adults who report having permanent teeth removed because of tooth decay or gum disease from 53% to 51%.

Local Strategy: Reduce the percentage of adults who had a permanent tooth removed because of tooth decay or gum disease in Miami-Dade from 48.8% to 45% by December 31, 2018.

Local Objective: Provide educational awareness on oral health topics to dental service professionals.

Baseline:

Miami Dade: 48.8%
Florida: 53.0% (BRFSS,2010)

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade
Women's Health & Preventive Services, Area Health
Education Center

Strategic Issue Area:

Enhance access to preventive, restorative and emergency oral health care.

HP2020 Goal: OH-7 Increase the proportion of children, adolescents, and adults who used the oral health care system in the past year

SHIP Strategy: AC4.2 Promote integration between the oral health care system and other health care providers, including information sharing, education for medical providers on preventive dental health services, more effective reimbursement, and incentives for improving coordination of care to improve access to oral health services and revision of Medicaid reimbursement rules

SHIP Objective: AC4.2.3 By Dec. 31, 2014, increase the percentage of adults who report having had their teeth cleaned in the past year from 60.9% to 64%.

Local Strategy: Develop an educational awareness campaign that encourages Miami-Dade individuals to participate in Preventive Oral Health Care Coverage.

Local Objective: Increase the percentage of adults who had their teeth cleaned in the past year in Miami-Dade from 62.5% to 64% by Dec. 31, 2018.

Baseline:  Miami Dade: 62.5% (BRFSS, 2010)
Florida: 60.9%

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade
Women's Health & Preventive Services, Area Health
Education Center

Strategic Issue Area:

Enhance access to preventive, restorative and emergency oral health care.

- HP2020 Goal:** OH-11 Increase the proportion of patients who receive oral health services at Federally Qualified Health Centers (FQHCs) each year
- SHIP Strategy:** AC4.2 Promote integration between the oral health care system and other health care providers, including information sharing, education for medical providers on preventive dental health services, more effective reimbursement, and incentives for improving coordination of care to improve access to oral health services and revision of Medicaid reimbursement rules
- SHIP Objective:** AC4.2.4 By Dec. 31, 2015, increase the percentage of the targeted low-income population receiving dental services from a county health department from 9.8% to 18.64%.
- Local Strategy:** Ensure the availability of the Seals on Wheels program in the areas of the county with decreased fluoridated water.
- Local Objective:** By Dec. 31, 2015, increase the percentage of the targeted low-income population receiving dental services in Miami-Dade by 10%.
- Baseline:** Pending.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade
Women's Health & Preventive Services, Area Health
Education Center

Strategic Issue Area:

Enhance access to preventive, restorative and emergency oral health care.

- HP2020 Goal:** OH-12 Increase the proportion of children and adolescents who have received dental sealants on their molar teeth
- SHIP Strategy:** AC4.3 Assess current and future practitioner needs via re-licensure surveys of dentists and dental hygienists to ascertain geographic distribution of practitioners and types of practice.
- SHIP Objective:** AC4.3.2 By Dec. 31, 2015, increase the percentage of children and adolescents who have received dental sealants on their molar teeth.
- Local Strategy:** Develop an awareness campaign for families on the importance of dental sealants on molar teeth in Miami Dade.
- Local Objective:** By Dec. 31, 2015, an awareness campaign will be developed and implemented.
- Baseline:** Pending.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade
Women's Health & Preventive Services Seals on
Wheels, Community Smiles

Strategic Issue Area:

Enhance access to preventive, restorative and emergency oral health care.

- HP2020 Goal:** OH-10 Increase the proportion of local health departments and Federally Qualified Health Centers (FQHCs) that have an oral health program
- SHIP Strategy:** AC4.3 Assess current and future practitioner needs via re-licensure surveys of dentists and dental hygienists to ascertain geographic distribution of practitioners and types of practice.
- SHIP Objective:** LONG-RANGE AC4.3.3 By Dec. 31, 2020, increase the percentage of federally qualified health centers (FQHCs) that have an oral health component from 75% to 83%.
- Local Strategy:** Increase the number of Federally Qualified Health Centers (FQHCs) dental services to underserved populations.
- Local Objective:** By Dec. 31, 2018, increase the number of federally qualified health centers (FQHCs) in Miami Dade that offer dental services to underserved populations from 12 to 15.

Baseline:  Miami Dade: 12 (Project Dentist Care Resource Guide, 2011)

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade
Women's Health & Preventive Services, Community
Smiles

Strategic Issue Area:

Enhance access to preventive, restorative and emergency oral health care.

HP2020 Goal: OH-13 Increase the proportion of the U.S. population served by community water systems with optimally fluoridated water

SHIP Strategy: AC4.4 Promote innovative oral health care delivery practice models.

SHIP Objective: AC4.4.2 By Dec. 31, 2013, secure funding to conduct an educational campaign focused on the benefits of community water systems with fluoridated water, and develop Strategy in partnership with communities that have evidence of changing perceptions and motivating change.

Local Strategy: Collaborate with Florida City to have fluoridated water.

Local Objective: By Dec. 31, 2018, FL City will develop a plan to have fluoridated water.

Baseline: Pending.

Priority Area Key

Access to Care

Mental Health & Mental Disorders

Chronic Disease Prevention

Key Health Disparity

HIV, STD & Infectious Diseases

Collaborative Agencies:

Florida Department of Health in Miami-Dade,
Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Enhance access to preventive, restorative and emergency oral health care.

HP2020 Goal: HC/HIT-10 Increase the proportion of medical practices that use electronic health records

SHIP Strategy: AC4.4 Promote innovative oral health care delivery practice models.

SHIP Objective: AC4.4.3 By Dec. 31, 2014, all CHDs providing dental services will have electronic dental records.

Local Strategy: Develop protocols for electronic health records.

Local Objective: By December 31, 2014, DOH-Miami-Dade will utilize an electronic health record to document its dental services per State Health Office standards.

Baseline: Pending.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade
Information Technology, Florida Department of
Health in Miami-Dade Women's Health &
Preventive Services

Strategic Issue Area:

Enhance access to preventive, restorative and emergency oral health care.

-
- HP2020 Goal:** OH-14 (Developmental) Increase the proportion of adults who receive preventive interventions in dental offices
- SHIP Strategy:** AC4.4 Promote innovative oral health care delivery practice models.
- SHIP Objective:** (DEVELOPMENTAL) AC4.4.5 By Jan. 1, 2014, increase the number of Medicaid physicians providing fluoride varnish and education in their offices by 25%.
- Local Strategy:** Promote dental sealants through community awareness campaigns.
- Local Objective:** By Jan. 1, 2015, a community awareness campaign will be developed.
- Baseline:** Pending.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade,
Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Reduce maternal and infant morbidity and mortality.

- HP2020 Goal:** MICH-16 Increase the proportion of women delivering a live birth who received preconception care services and practiced key recommended preconception health behaviors
- SHIP Strategy:** AC5.1 Raise awareness among providers and consumers on the importance and benefits of being healthy prior to pregnancy.
- SHIP Objective:** AC5.1.1 By Dec. 31, 2015, increase the percentage of women having a live birth, who prior to that pregnancy received preconception education and counseling regarding lifestyle behaviors and prevention strategies from a health care provider from 19.7% to 80%.
- Local Strategy:** Develop a process to promote essential health services for pregnant women in Miami-Dade.
- Local Objective:** By Dec. 31, 2015, increase the percentage of Miami-Dade county women having a live birth, who prior to that pregnancy received preconception education and counseling regarding lifestyle behaviors and prevention strategies from a health care provider in Miami-Dade.
- Baseline:** Pending.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade,
Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Reduce maternal and infant morbidity and mortality.

- HP2020 Goal:** MICH-5 Reduce the rate of maternal mortality Reduce the rate of maternal mortality
- SHIP Strategy:** AC5.1 Raise awareness among providers and consumers on the importance and benefits of being healthy prior to pregnancy.
- SHIP Objective:** AC5.1.2 By Dec. 31, 2015, reduce the rate of maternal deaths per 100,000 live births from 20.5 (2010) to 12.2.
- Local Strategy:** Create an educational campaign about healthy pregnancy that targets Black/Other Non-white races in Miami-Dade.
- Local Objective:** By Dec. 31, 2015, reduce the rate of maternal deaths per 100,000 live births in Miami-Dade from 43.6 to 35.0
- Baseline:**  Miami-Dade: 43.6
Florida: 38.5 (CHART, 2012)

Priority Area Key

- Access to Care
- Mental Health & Mental Disorders
- Chronic Disease Prevention
- Key Health Disparity
- HIV, STD & Infectious Diseases

Collaborative Agencies:

Florida Department of Health in Miami-Dade,
Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Reduce maternal and infant morbidity and mortality.

- HP2020 Goal:** FP-5 Reduce the proportion of pregnancies conceived within 18 months of a previous birth
- SHIP Strategy:** AC5.2 Raise the awareness of Medicaid Family Planning Waiver services for all women who lost full Medicaid services within the last two years to potentially eligible women.
- SHIP Objective:** AC5.2.1 By Dec. 31, 2015, decrease the percentage of births with inter-pregnancy intervals of less than 18 months from 36.9% (2010) to 36%.
- Local Strategy:** Leverage resources to enhance family planning related education in order to sustain short inter-pregnancy intervals at a low level.
- Local Objective:** By Dec. 31, 2016, decrease the percentage of births with inter-pregnancy intervals of less than 18 months from 15.63 to 14.0
- Baseline:**  Miami-Dade: 15.63 (CHARTS, 2012)

Priority Area Key

- Access to Care
- Mental Health & Mental Disorders
- Chronic Disease Prevention
- Key Health Disparity
- HIV, STD & Infectious Diseases

Collaborative Agencies:

Florida Department of Health in Miami-Dade,
Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Reduce maternal and infant morbidity and mortality.

- HP2020 Goal:** FP-6 Increase the proportion of females at risk of unintended pregnancy or their partners who used contraception at most recent sexual intercourse
- SHIP Strategy:** AC5.2 Raise the awareness of Medicaid Family Planning Waiver services for all women who lost full Medicaid services within the last two years to potentially eligible women.
- SHIP Objective:** AC5.2.2 By Dec. 31, 2015, decrease the percentage of women with unplanned or unwanted pregnancies from 47.4% (2008) to less than 45%.
- Local Strategy:** Develop an educational campaign which will ensure that information on family planning Services are available to the community.
- Local Objective:** By Dec. 31, 2015, decrease the percentage of Miami-Dade women with unplanned or unwanted pregnancies.
- Baseline:** Pending.

Priority Area Key

Access to Care

Mental Health & Mental Disorders

Chronic Disease Prevention

Key Health Disparity

HIV, STD & Infectious Diseases

Collaborative Agencies:

Florida Department of Health in Miami-Dade,
Consortium for a Healthier Miami-Dade

Strategic Issue Area:

Reduce maternal and infant morbidity and mortality.

HP2020 Goal: FP-8 Reduce pregnancies among adolescent females

SHIP Strategy: AC5.3 Utilize positive youth development sponsored programs to promote abstinence and reduce teen sexual activity.

SHIP Objective: AC5.3.1 By Dec. 31, 2015, decrease the percentage of teen births, ages 15–17, that are subsequent (repeat) births from 9% (2010) to 8.5%.

Local Strategy: Develop an educational campaign that will provide health education and counseling (including abstinence education) to teens in Miami-Dade.

Local Objective: By Dec. 31, 2015, decrease the percentage of Miami-Dade teen births, ages 15–17, that are subsequent (repeat) births from 7.8 to 7.0

Baseline:  Miami-Dade: 7.8

Florida: 7.4 (CHARTS, 2012)

Priority Area Key

Access to Care

Mental Health & Mental Disorders

Chronic Disease Prevention

Key Health Disparity

HIV, STD & Infectious Diseases

Use health information technology to improve the efficiency, effectiveness and quality of patient care coordination, patient safety and health care outcomes for all Floridians

HP2020 Goal: Use health communication strategies and health information technology (IT) to improve population health outcomes and health care quality, and to achieve health equity.

SHIP Strategy: HI1.2 Promote provider adoption of certified electronic health record software.

SHIP Objective: HI1.2.5 By Dec. 31, 2012, DOH will launch a certified electronic health record for county health departments.

Local Strategy: FDOH MD Information Technology department will develop a process to make use of electronic health records for Miami-Dade.

Local Objective: By Dec. 31, 2014, FDOH MD will launch a certified electronic health record for our county health department data transmission.

Baseline: Baseline data pending.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Use health information technology to improve the efficiency, effectiveness and quality of patient care coordination, patient safety and health care outcomes for all Floridians

HP2020 Goal: Use health communication strategies and health information technology (IT) to improve population health outcomes and health care quality, and to achieve health equity.

SHIP Strategy: HI1.2 Promote provider adoption of certified electronic health record software.

SHIP Objective: HI1.2.6 By Dec. 31, 2013, county health department clinical providers in all 67 counties will be using DOH certified electronic health records in accordance with criteria established by the Federal Office of National Coordination.

Local Strategy: Develop a plan to have all clinical providers throughout Miami-Dade using electronic health records.

Local Objective: By Dec. 31, 2014, FDOH MD clinical providers will be using DOH certified electronic health records in accordance with criteria established by the Federal Office of National Coordination.

Baseline: Baseline data pending.

Priority Area Key

Collaborative Agencies:

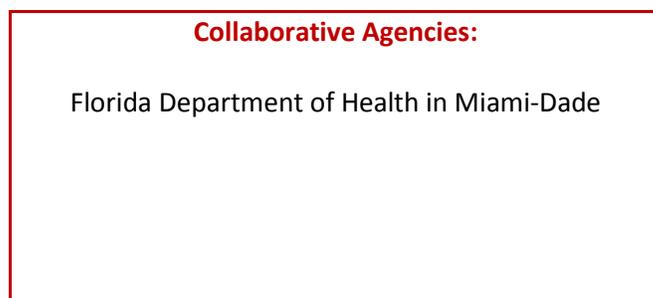

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Use health information technology to improve the efficiency, effectiveness and quality of patient care coordination, patient safety and health care outcomes for all Floridians

- HP2020 Goal:** Use health communication strategies and health information technology (IT) to improve population health outcomes and health care quality, and to achieve health equity.
- SHIP Strategy:** HI1.3 Use public health information technology and systems to efficiently track reportable diseases and conditions of public health significance, and to support public health disease prevention programs and epidemiological activities.
- SHIP Objective:** HI1.3.1 By Dec. 31, 2013, increase the number of laboratories electronically submitting reportable laboratory results to DOH (as required by FAC 64D-3) from 45 to 75.
- Local Strategy:** Increase communication with local laboratories to make them aware of the ability to electronically submit reportable laboratory results.
- Local Objective:** By Dec. 31, 2014, FDOH MD will increase the number of laboratories electronically submitting reportable laboratory results.
- Baseline:** Baseline data pending.

Strategic Issue Area:

Use health information technology to improve the efficiency, effectiveness and quality of patient care coordination, patient safety and health care outcomes for all Floridians

- HP2020 Goal:** Use health communication strategies and health information technology (IT) to improve population health outcomes and health care quality, and to achieve health equity.
- SHIP Strategy:** HI1.3 Use public health information technology and systems to efficiently track reportable diseases and conditions of public health significance, and to support public health disease prevention programs and epidemiological activities.
- SHIP Objective:** HI1.3.2 By Jan. 1, 2013, increase the percentage of reportable disease case reports where the department received electronically submitted laboratory reports to 65%.
- Local Strategy:** Create new partnerships with local laboratories and providers to receive reportable disease laboratory results electronically and ensure laboratories and providers know how to electronically submit laboratory results.
- Local Objective:** By Jan. 1, 2015, increase the percentage of reportable disease case reports where the FDOH- MD received electronically, submitted laboratory reports to 50%.
- Baseline:** Baseline data pending.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Use health information technology to improve the efficiency, effectiveness and quality of patient care coordination, patient safety and health care outcomes for all Floridians

-
- HP2020 Goal:** Use health communication strategies and health information technology (IT) to improve population health outcomes and health care quality, and to achieve health equity.
- SHIP Strategy:** HI1.3 Use public health information technology and systems to efficiently track reportable diseases and conditions of public health significance, and to support public health disease prevention programs and epidemiological activities.
- SHIP Objective:** HI1.3.3 By Dec. 31, 2013, increase the number of hospitals and urgent care centers submitting electronic information used for syndromic surveillance to DOH from 170 to 185.
- Local Strategy:** Ensure the efficient operation of necessary systems and data transmission through a plan that maintains the local syndromic surveillance system including Miami-Dade's ESSENCE.
- Local Objective:** By Dec. 31, 2014, increase the number of hospitals and urgent care centers submitting electronic information used for syndromic surveillance to FDOH-MD
- Baseline:** Baseline data pending.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Use health information technology to improve the efficiency, effectiveness and quality of patient care coordination, patient safety and health care outcomes for all Floridians

HP2020 Goal: Use health communication strategies and health information technology (IT) to improve population health outcomes and health care quality, and to achieve health equity.

SHIP Strategy: HI1.3 Use public health information technology and systems to efficiently track reportable diseases and conditions of public health significance, and to support public health disease prevention programs and epidemiological activities.

SHIP Objective: HI1.3.4 By Jan. 1, 2015, DOH will be using the statewide health information exchange to support public health case reporting and epidemiological case follow-up.

Local Strategy: Develop a local plan to implement public health information electronic exchange.

Local Objective: By Jan. 1, 2015, FDOH MD will be using the statewide health information exchange to support public health disease case reporting and epidemiological tracking and follow-up.

Baseline: Baseline data pending.

Priority Area Key

Collaborative Agencies:

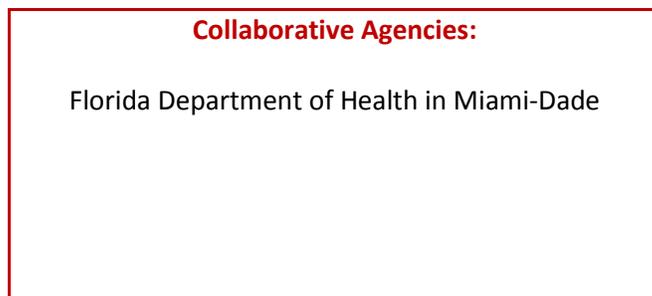

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Assure adequate public health funding to control infectious diseases, reduce premature morbidity and mortality due to chronic diseases, and improve the health status of residents and visitors

- HP2020 Goal:** Use health communication strategies and health information technology (IT) to improve population health outcomes and health care quality, and to achieve health equity.
- SHIP Strategy:** HI2.2 Update public health program office Legislative Budget Request funding methodologies in preparation for budget requests to replace reimbursement for public health services previously embedded in Medicaid Cost Based Reimbursement.
- SHIP Objective:** HI2.2.1 By Sept. 30, 2012, DOH programs for high priority service areas will complete sample budget requests in the standard legislative budget format. These programs include infectious disease control and epidemiology services; family health services.
- Local Strategy:** FDOH MD programs will develop a method to complete sample budget requests in the standard legislative budget format.
- Local Objective:** By Sept. 30, 2014, FDOH MD programs for high priority service areas will complete sample budget requests in the standard legislative budget format.
- Baseline:** Baseline data pending.

Strategic Issue Area:

Assure adequate public health funding to control infectious diseases, reduce premature morbidity and mortality due to chronic diseases, and improve the health status of residents and visitors

HP2020 Goal: Use health communication strategies and health information technology (IT) to improve population health outcomes and health care quality, and to achieve health equity.

SHIP Strategy: HI2.3 Routinely review and update fee policies and fee schedules.

SHIP Objective: HI2.3.1 By Sept. 30, 2012, DOH Central Office will implement the rule revision recommendations from the CHD Fee Workgroup to allow the enhanced ability to assess and collect fees from clinical patients who have the ability to pay.

Local Strategy: FDOH MD will follow the Central Office rule revision recommendations from the fee system.

Local Objective: By Sept. 30, 2014, will follow the Central Office rule revision recommendations from the fee system to allow the enhanced ability to assess and collect fees from clinical patients who have the ability to pay.

Baseline: Baseline data pending.

Collaborative Agencies:

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Attract, recruit and retain a prepared, diverse and sustainable public health workforce in all geographic areas of Florida

- HP2020 Goal:** ECP-11 (Developmental) Increase the proportion of local health departments that have established culturally appropriate and linguistically competent community health promotion and disease prevention programs.
- SHIP Strategy:** HI3.1 Facilitate collaboration between state agencies and universities to provide trainings and other resources that support and develop existing public health employees, particularly in the area of core competencies for public health professionals.
- SHIP Objective:** HI3.1.1 By July 30, 2013, DOH and the Florida Public Health Training Centers will produce the next workforce development needs assessment for public health professionals.
- Local Strategy:** Follow the next workforce development needs assessment for public health professionals and provide input as needed locally.
- Local Objective:** By July 30, 2014, FDOH MD and the Florida Public Health Training Centers will produce the next workforce development needs assessment for public health professionals.
- Baseline:** Baseline data pending.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Attract, recruit and retain a prepared, diverse and sustainable public health workforce in all geographic areas of Florida

- HP2020 Goal:** ECBP-19 Increase the proportion of academic institutions with health professions education programs whose prevention curricula include interprofessional educational experiences
- SHIP Strategy:** HI3.1 Facilitate collaboration between state agencies and universities to provide trainings and other resources that support and develop existing public health employees, particularly in the area of core competencies for public health professionals.
- SHIP Objective:** HI3.1.2 By Dec. 1, 2013, DOH and Florida Public Health Training Centers will produce a plan to collaboratively address identified training gaps, using data from the needs assessment.
- Local Strategy:** Follow the plan produced by DOH and implement it locally.
- Local Objective:** By Dec. 1, 2014, FDOH MD and Florida Public Health Training Centers will produce a plan to collaboratively address identified training gaps, using data from the needs assessment.
- Baseline:** Baseline data pending.

Priority Area Key

Collaborative Agencies:

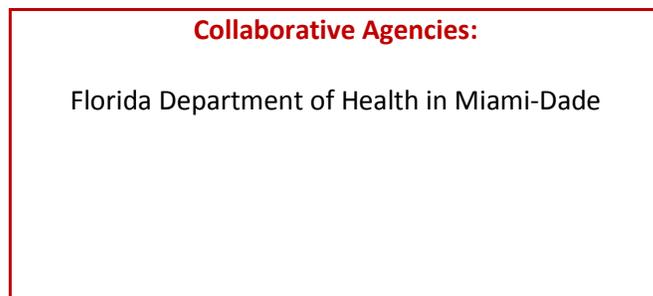

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Attract, recruit and retain a prepared, diverse and sustainable public health workforce in all geographic areas of Florida

- HP2020 Goal:** PHI-4 Increase the proportion of 4-year colleges and universities that offer public health or related majors and/or minors.
- SHIP Strategy:** HI3.2 Ensure that students graduating from colleges of public health have mastered the core competencies for public health professionals and have applied them through an internship.
- SHIP Objective:** HI3.2.1 By July 30, 2013, DOH and the Florida Colleges of Public Health will establish baseline data on the percentage of public health masters and doctoral students who are certified in public health (CPH) and create a new objective for improvement, if applicable.
- Local Strategy:** Develop a plan to identify MPH graduates and work with institutes to facilitate staff CPH obtainment.
- Local Objective:** By July 30, 2014, FDOH MD will establish baseline data on the percentage of public health masters and doctoral students who are certified in public health (CPH) and create a new objective for improvement, if applicable.
- Baseline:** Baseline data pending.

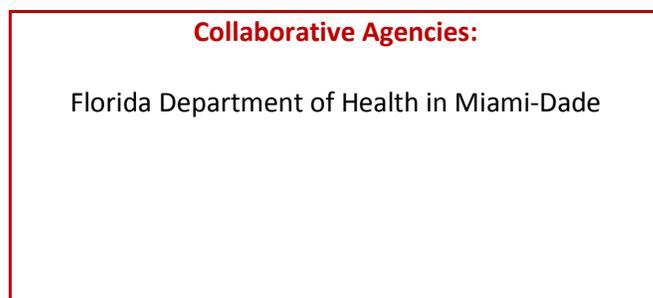

Strategic Issue Area:

Attract, recruit and retain a prepared, diverse and sustainable public health workforce in all geographic areas of Florida

- HP2020 Goal:** HI-3 Increase the proportion of Council on Education for Public Health (CEPH) accredited schools of public health, CEPH accredited academic programs, and schools of nursing (with a public health or community health component) that integrate core competencies.
- SHIP Strategy:** HI3.2 Ensure that students graduating from colleges of public health have mastered the core competencies for public health professionals and have applied them through an internship.
- SHIP Objective:** HI3.2.2 By Dec. 30, 2012, DOH and the Florida Colleges of Public Health will develop a plan to increase opportunities for graduate students to develop practical application skills through structured internships and other strategies that increase mastery of core competencies.
- Local Strategy:** Develop a plan to implement the state plan locally and follow all state directives.
- Local Objective:** By Dec. 30, 2014, FDOH MD will develop a plan to increase opportunities for graduate students to develop practical application skills through structured internships and other strategies.
- Baseline:** Baseline data pending.

Strategic Issue Area:

Attract, recruit and retain a prepared, diverse and sustainable public health workforce in all geographic areas of Florida

- HP2020 Goal:** To ensure that Federal, State, Tribal, and local health agencies have the necessary infrastructure to effectively provide essential public health services.
- SHIP Strategy:** HI3.3 Increase understanding of public health among the population of Florida in order to promote an interest in public health careers.
- SHIP Objective:** HI3.3.1 By Jan. 31, 2013, DOH Office of Workforce Development, the Florida Public Health Institute and the public health training centers will develop a marketing plan to increase visibility and understanding of the field of public health.
- Local Strategy:** Develop a plan to implement the state plan locally and follow all state directives.
- Local Objective:** By Jan. 31, 2014, FDOH MD will develop a marketing plan to increase visibility and understanding of the field of public health.
- Baseline:** Baseline data pending.

Priority Area Key

Collaborative Agencies:

Florida Department of Health in Miami-Dade

Strategic Issue Area:

Attract, recruit and retain a prepared, diverse and sustainable public health workforce in all geographic areas of Florida

HP2020 Goal: HI-1 Increase the proportion of Federal, Tribal, State, and local public health agencies that incorporate Core Competencies for Public Health Professionals into job descriptions and performance evaluations.

SHIP Strategy: HI3.4 Promote the development of workforce development plans for public health system partners who address current and future training and resource needs.

SHIP Objective: HI3.4.1 By July 1, 2012, DOH will have an approved workforce development plan that is shared throughout the Department and with public health system partners.

HI3.4.2 By July 1, 2013, DOH will achieve a minimum of two objectives in each of the goal areas

Local Strategy: Develop a plan to implement the state plan locally and follow all state directives ensuring alignment and execution of deliverables as determined in the workforce development plan.

Local Objective: By July 1, 2014, FDOH MD will have an approved workforce development plan that is implemented throughout the department and shared with public health system partners. A minimum of two objectives in each of the goal areas will be reached.

Baseline: Baseline data pending.
