## **SUMMARY – SCHOOL HEALTH SERVICES PLAN 2018–2020**

Statutory Authority: Section 381.0056, Florida Statute (F.S.) requires each local Department of Health to develop, jointly with the school district and school health advisory committee, a School Health Services Plan (referred herein as the “Plan”) that outlines the provisions and responsibilities to provide mandated health services in all public schools. Chapter 64F-6.002, Florida Administrative Code (F.A.C.) requires the plan to be completed biennially.

**The Plan format is arranged in 3 parts relating to the services provided and funding streams, as follows:**

- Part I: Basic School Health Services - General school health services which are available to all students in Florida’s public and participating non-public schools in all 67 school districts.
- Part II: Comprehensive School Health Services – include increased services in section 381.0057, Florida Statutes, for student health management, interventions and classes. These services promote student health; reduce high-risk behaviors and their consequences (substance abuse, unintentional/intentional injuries, and sexually transmitted diseases); provide pregnancy prevention classes and interventions; and provide support services to promote return to school after giving birth.
- Part III: Health Services for Full Service Schools (FSS) – Includes basic school health services and additional specialized services that integrate education, medical, social and/or human services such as nutrition services, basic medical services, aid to dependent children (temporary assistance for needy families (TANF)), parenting skills, counseling for abused children, counseling for children at high risk for delinquent behavior and their parents or guardian, and adult education to meet the needs of the high-risk student population and their families. These services are required of schools as defined in section 402.3026, Florida Statutes.

**The Plan contains 4 columns, as follows:**

- Column 1 –Requirements and References. This column includes Florida Statutes, Administrative Codes and references demonstrating best practices related to school health.
- Column 2 – Program Standards. This column provides specific requirements related to the statutes, administrative code and references listed in Column 1.
- Column 3 – Local Agency(s) Responsible. The local agencies (Department of Health, Educational Agency (LEA), and School Health Advisory Committee (SHAC)) determine the responsibilities for providing the services described columns 1 and 2.
- Column 4 – Local Implementation Strategy & Activities. This column describes the implementation strategies and activities to fulfill requirements in columns 1 and 2.
