Among adults (age 13+) one in 111 Hispanic men and one in 439 Hispanic women were living with HIV/AIDS in 2010, compared to one in 201 white men and 1,121 white women.

Of those 18,727 living HIV/AIDS cases among Hispanic through 2010, 30% were US born, 15% Cuban born, 10% Puerto Rican born, 5% Mexican born, 26% were born elsewhere and the remaining 14% had an unknown country of birth.

Recommendations:

- Raising awareness about HIV/AIDS among Hispanic;
- Encourage individuals to be tested for HIV/AIDS;
- Increase youth involvement in HIV community planning, decision making and HIV prevention programming;
- Reduce barriers to HIV testing, prevention and care by reducing HIV/AIDS stigma; and
- Disseminate information on the health benefits of condoms and other risk reduction measures.
