

## MIAMI-DADE COUNTY NEIGHBORHOOD PROFILES

The present surveillance analysis includes demographic profiles for each of the ten zones (neighborhoods) we divided our county. The data shows in each zone, cumulative number of documented people living with a diagnosis of HIV or AIDS through December 31st, 2013, as of June 2014, by race/ethnicity, current age group and specific risk factors, according to gender, as well as a total people living with HIV or AIDS [PLWHA] through that date in our county.

People living with HIV or AIDS has been updated by the Florida Department of Health, Bureau of Communicable Disease, HIV/AIDS & Hepatitis Section, in June 2014, using the National Death Index [NDI] latest information for death cases.

Total reported people living with HIV or AIDS are those reported cases regardless of where they are currently living.

**Zone I**, which includes Hialeah, Miami Lakes, Hialeah Gardens, Miami Springs, Medley and vicinity, has the sixth highest number of people living with HIV/AIDS [PLWHA]. Analysis by race/ethnicity, current age group and risk category according to gender as follow:
