**FloridaHealth.gov**

FLORIDA DEPARTMENT OF HEALTH IN **MONROE COUNTY**  
HIV/AIDS Surveillance

Please note that as of January 2016, all HIV/AIDS Data will be based on the following.

Per the Bureau of HIV/AIDS:

Current HIV Infection data by year of report reflects any case meeting the CDC definition of 'HIV infection' which includes all newly reported HIV cases and newly reported AIDS cases with no previous report of HIV in Florida.

If a case is later identified as being previously diagnosed and reported from another state, the case will no longer be reflected as a Florida case and the data will be adjusted accordingly.

Data from the most recent calendar year (2015) are considered provisional and therefore should not be used to confirm or rule out an increase in newly reported cases in Florida.

The final year-end numbers are generated in July of the following year, after duplicate cases are removed from the dataset, as is customary of HIV surveillance in the US.

**FLORIDA DEPARTMENT OF HEALTH IN MONROE COUNTY**
