

Alcohol-related Motor Vehicle Crash Deaths By Florida County of Residence, 2007-2009

During the years 2007-2009, Miami-Dade County averaged 84 alcohol-related motor vehicle crash (MVC) deaths per year. This resulted in a fatality rate of 3.4/100,000, the lowest among all 67 Florida counties. As shown in the graph above, the highest rates of alcohol-related MVC deaths occurred in mostly rural counties (dark blue counties). The south Florida counties of Miami-Dade, Broward and Palm Beach ranked in the lowest quartile for alcohol-related MVC deaths.

The graph at the left compares alcohol-related MVC death rates for Miami-Dade County and Florida averaged every three years between 2000-2009.

Both Miami-Dade and Florida showed virtually no change in the death rate over this period, with Miami-Dade's rate approximately one-half the death rate observed for the state.

Alcohol-related Motor Vehicle Traffic Crash Deaths

Rolling 3-Year Rates, 2005-2009

County	Average Number of Deaths			Rate Per 100,000			2007-09
