Abbott Issues Recall of Certain Ready-to-Feed (RTF) Formulas

Contact:

Office of Communications
786-336-1276

Miami, Fla. – [Abbott](#) has issued a press release voluntarily recalling certain lots of 2 fluid ounce/59 milliliter bottles of Ready-to-Feed (RTF) liquid formula products. For a list of products and lot numbers included in the recall, click [here](#) or call 1-800-986-8540.

According to Abbott, “These products are being recalled because a small percentage of bottles (less than 1%) in the recalled lots have bottle caps that may not have sealed completely, which could result in spoilage.” The brands included in this recall are:

- Similac® Pro-Total Comfort®
- Similac® 360 Total Care®
- Similac® 360 Total Care® Sensitive
- Similac® Special Care® 24
- Similac® Stage 1
- Similac® Water (Sterilized)
- Similac® NeoSure®

The Department has notified current WIC participants who may have been issued a recalled product to provide them with alternative options.

In addition to these formula products, the following product has also been recalled:

- Pedialyte® Electrolyte Solution

According to [Abbott](#), this recall should not impact overall formula supply. Floridians who use these products should visit [Abbott's website](#) to view a list of impacted products or use the lot number checker online. It is important to verify the lot number on the bottom or the side of the bottle, as not all products are included in the recall. If your product is included in the recall, immediately discontinue use of the product and contact Abbott customer service at 1-800-986-8540 for further instructions.

For all feeding-related questions or concerns about your child’s health, contact a health care professional or DOH-Miami-Dade WIC (Women, Infants & Children) Program at 786-336-1300.
