

Revised Surveillance Case Definition for HIV Infection

Following extensive consultation and peer review, CDC and the Council of State and Territorial Epidemiologists have revised and combined the surveillance case definitions for human immunodeficiency virus (HIV) infection into a single case definition for persons of all ages (i.e., adults and adolescents aged ≥ 13 years and children aged < 13 years). The revisions were made to address multiple issues, the most important of which was the need to adapt to recent changes in diagnostic criteria. Laboratory criteria for defining a confirmed case now accommodate new multitest algorithms, including criteria for differentiating between HIV-1 and HIV-2 infection and for recognizing early HIV infection. A confirmed case can be classified in one of five HIV infection stages (0, 1, 2, 3, or unknown); early infection, recognized by a negative HIV test within 6 months of HIV diagnosis, is classified as stage 0, and acquired immunodeficiency syndrome (AIDS) is classified as stage 3. Criteria for stage 3 have been simplified by eliminating the need to differentiate between definitive and presumptive diagnoses of opportunistic illnesses. Clinical (nonlaboratory) criteria for defining a case for surveillance purposes have been made more practical by eliminating the requirement for information about laboratory tests. The surveillance case definition is intended primarily for monitoring the HIV infection burden and planning for prevention and care on a population level, not as a basis for clinical decisions for individual patients. CDC and the Council of State and Territorial Epidemiologists recommend that all states and territories conduct case surveillance of HIV infection using this revised surveillance case definition.

The updated version of eHARS, which is now named eHARS 4.6, was released by the CDC on July 11, 2014, and implemented by Florida on September 2014, with revised Surveillance Case Definition for HIV Infection. The implementation date for the Revised Surveillance Case Definition for HIV Infection is January 1, 2014. Meaning, once in production, eHARS 4.6 will recognize and apply the new case definition of all cases with a specimen collection date on or after January 1, 2014. **A small percentage of cases that met the AIDS surveillance definition will no longer meet the definition. A small percentage of the pediatric cases that previously met the HIV surveillance case definition may now be recognized as an AIDS case based on the revisions to the surveillance case definition for children aged 6-12 years.**

Mission:

To protect, promote & improve the health of all people in Florida through integrated state, county & community efforts.

Vision: To be the Healthiest State in the Nation

HIV/AIDS SURVEILLANCE

MONTHLY HIV/AIDS SURVEILLANCE REPORT

OCTOBER 2014

AIDS CASES (EXCLUDING DEPARTMENT OF CORRECTION [DOC] CASES) *(AIDS Worksheet)*

- AIDS cases by age group and gender (Excluding Department of Correction - DOC).
- AIDS cases by age group, race/ethnicity & gender, showing Haitians separated (Excluding DOC)
- AIDS cases by year of report and gender (Excluding DOC)
- Adult & pediatric AIDS cases by race/ethnicity and gender (Excluding DOC)
- Adult & pediatric AIDS cases by mortality status and gender (Excluding DOC)
- AIDS cases by exposure category and gender among Adult and Pediatric (Excluding DOC)
- Adult AIDS cases by exposure category, race/ethnicity and gender (Excluding DOC)
- Pediatric AIDS cases by exposure category, race/ethnicity and gender.
- Adult Hispanic/Latino AIDS cases by country of origin and gender (Excluding DOC)
- Adult Hispanic/Latino AIDS cases by country of origin, exposure category and gender (Excluding DOC)
- Haitian born adult AIDS cases by exposure category and gender (Excluding DOC)
- Department of Correction [DOC] Adult AIDS cases and total people living with AIDS by race/ethnicity and gender.

HIV CASES (EXCLUDING DEPARTMENT OF CORRECTION [DOC] CASES) *(HIV Worksheet)*

- HIV (not AIDS) cases by age group and gender (Excluding Department of Correction - DOC)
- HIV (not AIDS) cases by age group, race/ethnicity & gender, showing Haitians separated (Excluding DOC)
- HIV (not AIDS) cases by year of report and gender (Excluding DOC)
- Adult & pediatric HIV (not AIDS) cases by race/ethnicity and gender (Excluding DOC)
- Adult & pediatric HIV (not AIDS) cases by mortality status and gender (Excluding DOC)
- HIV (not AIDS) cases by exposure category and gender among Adult and Pediatric (Excluding DOC)
- Adult HIV (not AIDS) cases by exposure category, race/ethnicity and gender (Excluding DOC)

PERINATAL EXPOSED CASES REPORTED SINCE NOVEMBER 20th, 2006 (*PERINATAL EXPOSED Worksheet*)

All EXPOSED perinatal pediatric cases born in Miami-Dade by year of birth and diagnosis status since November 20th, 2006.
All EXPOSED perinatal pediatric cases born in Miami-Dade by year of birth and race/ethnicity since November 20th, 2006.
All EXPOSED perinatal pediatric cases born in Miami-Dade by year of birth and Mother HIV status since November 20th, 2006.
All EXPOSED perinatal pediatric cases born in Miami-Dade by diagnosis and Mother HIV status since November 20th, 2006.
All EXPOSED perinatal pediatric cases born in Miami-Dade by diagnosis status and HIV category since November 20th, 2006.
CONFIRMED infected perinatal cases born in Miami-Dade, known HIV or AIDS by year of birth, 2000-2013.
All EXPOSED perinatal pediatric cases born in Miami-Dade by hospital of birth and diagnosis status since November 20th, 2006.

ONE-IN STATEMENTS (*ONE-IN STATEMENTS Worksheet*)

One-in statements for persons (all ages) living with HIV or AIDS through 2013 (all ages) in Miami-Dade & Florida.
One-in statements for adult (≥ 13) persons living with HIV or AIDS through 2013 in Miami-Dade & Florida.

⁽¹⁾ NOTE: An expanded HIV reporting law was implemented on November 20th, 2006. Expansion included reportability of cases with virologic evidence of HIV infection. Previously, only Western Blot-confirmed (+) cases were reportable. In addition, reporting is retroactive. Previously, only HIV cases diagnosed after July st, 1997, were reportable. A detectable viral load (VL) (or equivalent viral test) is reportable, and is considered evidence of HIV. Other reportable virologic test considered to be evidence of HIV are: P24, ANTIGEN, Nucleic Acid test (NAT/NAAT), viral culture. CD4 counts/percents are reportable, but follow-up is conducted only if it is <200 uL, or <14%.

⁽²⁾ Other Includes American Indian/Alaska Native, Asian, Native Hawaiian, Pacific Islander, Legacy Asian & Multi Race

⁽¹⁾ NOTE: An expanded HIV reporting law was implemented on November 20th, 2006. Expansion included reportability of cases with virologic evidence of HIV infection. Previously, only Western Blot-confirmed (+) cases were reportable. In addition, reporting is retroactive. Previously, only HIV cases diagnosed after July st, 1997, were reportable. A detectable viral load (VL) (or equivalent viral test) is reportable, and is considered evidence of HIV. Other reportable virologic test considered to be evidence of HIV are: P24, ANTIGEN, Nucleic Acid test (NAT/NAAT), viral culture. CD4 counts/percents are reportable, but follow-up is conducted only if it is <200 uL, or <14%
